

EmPOWER™ Cloud Services

For Device Management And Updates

EmPOWER™ is a SaaS solution that provides the essential cloud services needed to secure, provision, update and manage intelligent edge devices.

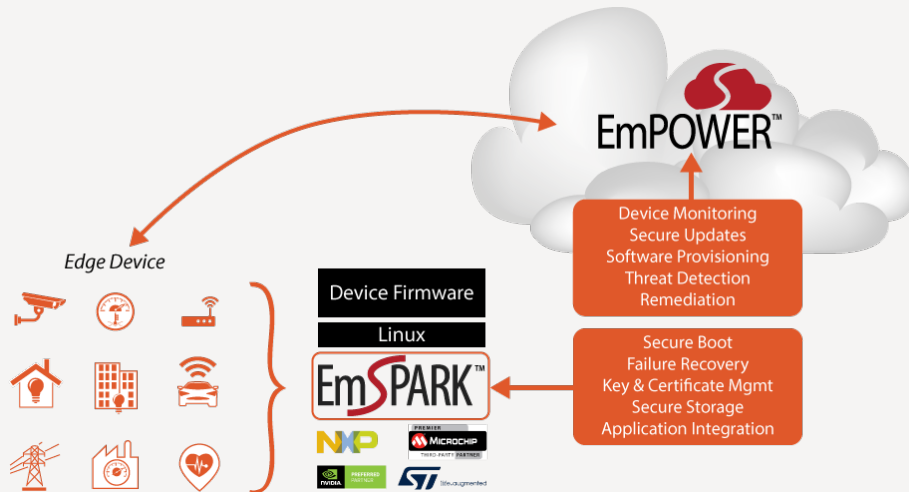

Together with the EmSPARK™ Security suite, EmPOWER™ enables OEM's to actively protect their devices, business, and customers. With EmPOWER, product developers can:

- + Update devices securely
- + Prevent Intellectual property theft
- + Ensure trust throughout the product lifecycle
- + Maintain visibility of thousands of devices
- + Gain insights into device behavior
- + Protect data at rest and in transit
- + Detect and respond to threats

FEATURES

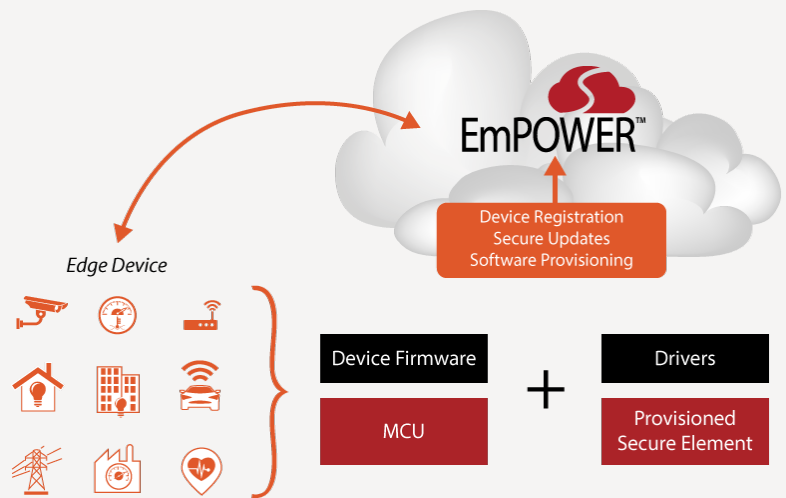

- + Device registration with unique identifiers
- + Secure, mutually authenticated command and control from chip-to-cloud
- + Secure Over-the-Air (OTA) updates using authenticated commands and signed/ encrypted firmware
- + Tools for Protecting AI/ML
- + Secure Software Provisioning
- + Failure Recovery
- + Threat detection and Remediation
- + Trusted insights into Device Behavior

Solution Overview: EmPOWER™ with EmSPARK™ Security Suite

EmPOWER™ for MPUs

EmPOWER™ can support smart devices with a secure element or other hardware. EmPOWER™ can deliver secure product updates, secure software provisioning, and device registration with this implementation.

Sequitur Labs is developing seminal technologies to improve trust in a connected world, reducing the cost and complexity to build secure embedded and IoT devices. Sequitur's products span a range of disciplines required for trusted computing, from boot through the full device lifecycle. Sequitur's security solutions provide real business value to device makers, such as reducing BoM costs, protecting revenue by thwarting IP theft, improving product reliability and reducing liability, and improving device lifecycle management processes.
